

Cprocess® work management software

Cprocess® is a web-based work management software for SAP environments. Customers manage and govern their knowledge, projects, processes and business applications in an integrated application.

Your Challenge

In today's business the daily work and project work of employees is stored in disparate software systems e.g. project management, process tools, document management, ticketing systems, email systems, office systems etc. Full process transparency and governance is missing.

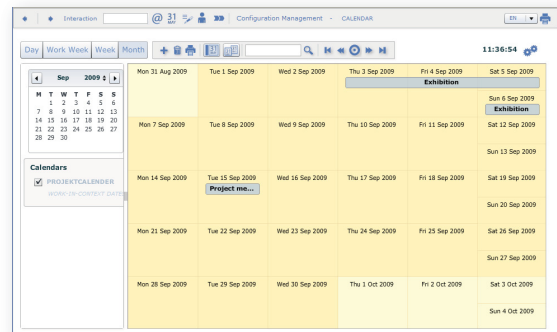

Cprocess® establishes ad-hoc reporting capabilities of corporate knowledge, operational processes and tasks for IT organisations and for business departments in SAP NetWeaver.

Scope

- Work and task management
- Workforce management
- Project and portfolio management
- Workforce utilisation
- Knowledge management
- Central calendar cockpit
- Central correspondence cockpit
- Business process management
- Business activity monitoring

Your Benefit

- One central and SAP based software system to manage all employees' work
- Reliance on familiar and established SAP IT infrastructure and operation
- Only a browser is necessary for business users and process experts
- Unlimited customization and coding-free integration in each SAP ERP object with Cpronto® Studio*

Cprocess® out-of-the-box integration

- LDAP system integration
- SAP Portal
- SAP TREX search engine
- SAP Knowledge Management
- SAP R/3 two-way integration
- Companio Cpronto® Studio*
- PRINCE2, PMBoK, ISO 9000, ISO 20000
